AMJAD ALI

Senior React Native Developer · iOS (Swift) · Android (Kotlin)

Lahore, Pakistan · Open to Remote · +92 335 4978834 · amjadalikhokhar999@gmail.com · LinkedIn · GitHub

PROFESSIONAL SUMMARY

Senior React Native Developer with **5+ years** building high-performance, cross-platform mobile applications, complemented by native **iOS (Swift)** and **Android (Kotlin)** development, across access-control/IoT (smart locks), field-service SaaS, gamified rewards & loyalty platforms, fashion & lifestyle, and e-commerce delivery domains. Proven record delivering iOS, Android, and Web products end-to-end — architecture, state management, testing, and App Store/Play Store release. Expert in TypeScript, REST API integration, CI/CD (CodeMagic, Fastlane), and native-bridge architecture.

CORE TECHNICAL SKILLS

Mobile	React Native, Expo, iOS Native (SwiftUI, UIKit), Android Native (Jetpack Compose), Native Modules, React Navigation, Reanimated, In-App Purchase, Google Maps, AdMob, Push Notifications (FCM, APNs), Deep Linking, Social Logins, App Store & Play Store Deployment
Frontend (Web)	React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
State & Data	Redux Toolkit, Context API, React Query, GraphQL, Shared Preferences, SwiftData, Firebase, REST APIs
Backend & APIs	Node.js, FastAPI, Laravel, Firebase (Auth, Firestore, Cloud Functions), Kinde, JWT
Testing & DevOps	Detox (E2E), Jest, React Testing Library, CodeMagic, Fastlane, GitHub Actions, Crashlytics
Tools & Workflow	Git, GitHub, GitLab, Jira, ClickUp, Trello, Agile/Scrum, Code Reviews, Mentoring
Languages	JavaScript, TypeScript, Kotlin, Swift, C++, HTML, CSS, Python (familiar), Java (familiar)

PROFESSIONAL EXPERIENCE

Senior React Native Developer / Mobile App Developer · Aa'la Solutions *2020 – Present*

- Own end-to-end delivery of **production mobile and web apps** across iOS, Android, and Web — architecture through App Store/Play Store release — using React Native/Expo, native Swift/SwiftUI, and native Kotlin/Jetpack Compose.
- Develop native Android apps (Kotlin, XML layouts, Jetpack Compose) and native iOS apps (UIKit, SwiftUI) for projects requiring deeper platform integration than React Native/Expo can provide.
- Diagnose and resolve broken API integrations and extend feature sets across Expo-based apps; built a dedicated local-notification/alarm app end-to-end.
- Set up CodeMagic CI/CD pipelines to automate builds, testing, and store deployments, streamlining release workflows across projects.
- Architect reusable component libraries and native modules adopted as a shared foundation across multiple client projects, cutting redundant setup work and standardizing delivery speed for every new app.
- Implement React Navigation, Reanimated-driven UI, push notifications (FCM/APNs), and deep linking to deliver smooth, native-feeling experiences on every release.
- Improve app performance and responsiveness through memory optimization, efficient state management, and rendering best practices across both React Native and native codebases.
- Integrate REST APIs and third-party services — Google Maps, Firebase, AdMob, in-app purchases, OpenAI — into production apps spanning consumer, utility, and access-control domains; extend backend functionality with Laravel and Node.js as needed.
- Partner directly with designers, PMs, and backend engineers from planning through release; train and mentor interns and junior developers on React Native fundamentals and code quality.

React Native Developer · Namaz App *Part-time | Remote*

- Build and maintain **Namaz**, a prayer time & Qibla direction app serving the global Muslim community, grown to **100,000+ downloads** on iOS and Android.
- Implement location-precise prayer time calculations, Qibla direction, and local notification alerts using React Native, Redux Toolkit, and native location services.
- Own the app independently alongside full-time work — from feature development through App Store and Play Store releases.

Intern — Data Mining & Machine Learning · **NESCOM** *Jul 2019 – Sep 2019*

- Contributed to a data mining and data science project applying machine learning algorithms using Python/Jupyter Notebook, delivering assigned tasks on schedule within a collaborative team.

KEY PROJECTS

DressedUp — AI-powered feedback app for personal presentation before dates, interviews, and everyday life · iOS · Android
Stack: React Native, TypeScript, Redux Toolkit, Camera, In-App Purchase, OpenAI, Firebase Cloud Functions

App Store · Google Play

Sitepics — Geo-located picture management cloud for business teams, contractors, and field staff · iOS · Android
Stack: React Native, JavaScript, Redux Toolkit, Camera, Google Maps, REST APIs

App Store · Google Play

5DKey — Digital wallet for virtual proximity cards (vCards) enabling instant building-access distribution and recall · iOS · Android
Stack: iOS Native (SwiftUI, SwiftData), Android Native (Jetpack Compose, SharedPreferences), Kinde, REST APIs, Safetrust SDK, Delegated Authentication

App Store · Google Play

Namaz — Prayer time & Qibla direction app with location-precise calculations, serving the global Muslim community · **100,000+ downloads** · iOS · Android
Stack: React Native, JavaScript, Redux Toolkit, Local Notifications, Location

App Store · Google Play

Consumer Break — Sponsored-prize jigsaw puzzle competition app · Aa'la Solutions

Stack: React Native, JavaScript, Reanimated, Redux Toolkit, AdMob, Firebase Push Notifications, Social Logins, Laravel, REST APIs

EDUCATION

B.S. Computer Science · Bahria University, Lahore *2016 – 2020*

LANGUAGES

Urdu (Native) · English (Professional Working Proficiency)

HOBBIES

Cricket · Table Tennis · Chess
